SUBJECT INDEX TO VOLUME 115

Engineering mechanics

Pretest analysis of a 1:6-scale reinforced concrete containment model subject to pressurization, P.A. Pfeiffer, R.F. Kulak, J.M. Kennedy, A.H. Marchertas, C. Fiala and T. Belytschko 115 (1989) 73
Effects of commercial cladding on the fracture behaviour of pressure vessel steel plates, S.K. Iskander, D.J. Alexander, S.E. Bolt, K.V. Cook, W.R. Corwin, B.C. Oland, R.K. Nanstad and G.C. Robinson 115 (1989) 349

Materials properties

Analysis of pressure vessel steel fatigue tests in air, E.D. Eason, S.P. Andrew, S.B. Warmbrodt, E.E. Nelson and J.D. Gilman 115 (1989) 23
Application of tanh curve fit analysis to fracture toughness data of Japanese RPVS, Y. Sakai, K. Tamanoi and N. Ogura 115 (1989) 31
Experimental and numerical studies of impacts on stainless steel plates subjected to rigid missiles at low velocity, M. Lepareux, Ph. Jamet, Ph. Matheron, J.L. Lieutenant, J. Couilleaux, D. Duboelle and J. Aguilar 115 (1989) 105
Performance of low-upper-shelf material under pressurized-thermal-shock loading, R.H. Bryan, B.R. Bass, S.E. Bolt, J.W. Bryson, W.R. Corwin, R.K. Nanstad, J.G. Merkle and G.C. Robinson 115 (1989) 359

Mechanical design, component fabrication and testing

Influence of model geometry on stress intensity for a cyclically thermally loaded nozzle corner crack, R. Wanner, S. Brosi, R. Rösel and O. Mercier 115 (1989) 1
The major results of the PISC II RRT, S. Crutzen, P. Jehenson, R.W. Nichols and H. McDonald 115 (1989) 7
Evaluation of flaws in nuclear piping, D.M. Norris and K. Kishida 115 (1989) 41
Investigations on the behaviour of structural parts of PCRVs as a basis for specific HTR design criteria, K. Schimmelpfennig and M. Borgerhoff 115 (1989) 49
Response of buried pipes to missile impact, C. Vardanega, M.G. Cremonini, M. Mirone and A. Luciani 115 (1989) 91
Experimental and numerical studies of impacts on stainless steel plates subjected to rigid missiles at low velocity, M. Lepareux, Ph. Jamet, Ph. Matheron, J.L. Lieutenant, J. Couilleaux, D. Duboelle and J. Aguilar 115 (1989) 105
Wear in check valves due to flow induced motion, P. Griffith and J.C. Sununu 115 (1989) 323
Containment penetration System (CPS) valve tests under accident loads, H.S. Crapo 115 (1989) 331
Performance of a piping system and equipment in the HDR simulated seismic experiments, R. Steele, Jr. and J.G. Arendts 115 (1989) 339
Effects of commercial cladding on the fracture behaviour of pressure vessel steel plates, S.K. Iskander, D.J. Alexander, S.E. Bolt, K.V. Cook, W.R. Corwin, B.C. Oland, R.K. Nanstad and G.C. Robinson 115 (1989) 349
Performance of low-upper-shelf material under pressurized-thermal-shock loading, R.H. Bryan, B.R. Bass, S.E. Bolt, J.W. Bryson, W.R. Corwin, R.K. Nanstad, J.G. Merkle and G.C. Robinson 115 (1989) 359
Surry steam Generator Program: Final results, evaluation of NDE performance, and technical basis for improved ISI and plugging criteria, R.J. Kurtz, E.R. Bradley, F.A. Simonen and W.M. Bowen 115 (1989) 369

Reactor concepts and systems analysis

Prospects for use of probabilistic safety criteria, F. Niehaus 115 (1989) 181
Future directions in boiling water reactor design, B. Wolfe and D.R. Wilkins 115 (1989) 281

Safeguard engineering

Effect of decontamination on aging processes and considerations for life extension, D.R. Diercks 115 (1989) 207

Structural design, construction methods and testing

Investigations on the behaviour of structural parts of PCRVs as a basis for specific HTR design criteria, K. Schimmelpfennig and M. Borgerhoff 115 (1989) 49

Reinforced concrete membrane elements subjected to reversed cyclic in-plane shear stress, N. Ohomori, H. Tsubota, N. Inoue, K. Kurihara and S. Watanabe 115 (1989) 61
Response of buried pipes to missile impact, C. Vardanega, M.G. Cremonini, M. Mirone and A. Luciani 115 (1989) 91
Development of design guidance for low velocity impacts on concrete floors, K. Fullard and P. Barr 115 (1989) 113
Penetration, scabbing and perforation of concrete structures hit by solid missiles, J.D. Riera 115 (1989) 121

Nuclear waste management and disposal

Effect of decontamination on aging processes and considerations for life extension, D.R. Diercks 115 (1989) 207

Core physics and fuel design

The microstructural and microchemical characterization of samples from the TMI-2 core, L.A. Neimark, R.V. Strain, J.E. Sanecki and W.D. Jackson 115 (1989) 315

Nuclear safety

Treatment of dependent failure in PSA, I.A. Watson and B.D. Johnston 115 (1989) 133
Probabilistic models of fatigue crack growth: results and speculations, F. Kozin and J.L. Bogdanoff 115 (1989) 143
Uncertainty in probabilistic safety assessment, G.E. Apostolakis 115 (1989) 173
Prospects for use of probabilistic safety criteria, F. Niehaus 115 (1989) 181
Consideration of severe accidents in the licensing of nuclear power plants, Z.R. Rosztoczy 115 (1989) 193
Managing the effects of aging and reliability improvement, R.E. Hall, W. Gunther and J.L. Boccio 115 (1989) 201
Nuclear safety research: Responsive industry results, A. Rubio, W.B. Loewenstein and R. Oehlberg 115 (1989) 219
Application of a methodology to determine priorities of nuclear power plant safety issues, P.M. Daling and W.C. Milstead 115 (1989) 273
Advanced severe accident response models for BWR application, L.J. Ott 115 (1989) 289
United States Nuclear Regulatory Commission research program on molten core debris interactions in the reactor cavity, S.B. Burson, D. Bradley, J. Brockman, E. Copus, D. Powers, G. Greene and C. Alexander 115 (1989) 305
The microstructural and microchemical characterization of samples from the TMI-2 core, L.A. Neimark, R.V. Strain, J.E. Sanecki and W.D. Jackson 115 (1989) 315
Containment Penetration System (CPS) valve tests under accident loads, H.S. Crapo 115 (1989) 331
